Chronicle

New Zealand Japan Foundation

During the visit to New Zealand in January this year of the former Japanese Prime Minister, the late Mr Ohira, the Prime Minister, Mr Muldoon, announced that the New Zealand Government was to establish a Foundation to promote better understanding between New Zealand and Japan.

Japan is now one of New Zealand's most important export markets and is playing an increasingly significant role in the affairs of Asia and the Pacific. But because of the relatively short period of our association, and the cultural and linguistic differences, New Zealand's relations with Japan are not yet as wide-ranging as those we enjoy with our other major trading partners such as Australia, the United Kingdom and the United States. It was in recognition of this fact that the Foundation was established to encourage study and discussion on matters of a common concern and to promote exchanges of people and ideas between New Zealand and Japan.

Board of Directors

On 25 June the Minister of Foreign Affairs announced that Mr J. C. Fair of Wellington would be the Chairman of the Board of Directors of the Foundation, and that the other Directors would be Mr J. H. Ingram of Auckland, Managing Director of New Zealand Steel, Mr T. C. Larkin of Wellington, former New Zealand Ambassador to Japan, Mr James Maddren of Christchurch, Managing Director of Maddren Brothers and past President of the New Zealand Manufacturers Association, and Professor R. G. Mulgan of Dunedin, Associate Professor of Political Science in the University of Otago. In addition, the Japanese Ambassador in Wellington and the Secretary of Foreign Affairs are ex-officio members of the Board.

Draft Terms of Reference

At its first meeting on 4 August, the Board of Directors agreed on a draft Terms of Reference for the Foundation and these are set out below. These are still in "draft" form

as the Board wishes to remain flexible and to be able to adjust to the needs of the New Zealand/Japan relationship as the occasion arises.

"Origins

The establishment of the New Zealand/Japan Foundation was announced in January 1980 during the visit here of the late Japanese Prime Minister, Mr Ohira. It represents an important New Zealand contribution towards the 'total relationship as good neighbours' which both countries have accepted as an objective between them.

New Zealand's association with Japan is one of the most significant, varied and rewarding that it enjoys—but it lacks depth. Although there is substantial and growing curiosity between them, New Zealanders and Japanese are not yet well informed about each other's history, language, customs and aspirations. The New Zealand/Japan Foundation is intended to help redress that situation.

Membership

The Chairman of the Foundation's Board of Directors is Mr J. C. Fair. Other members are Mr J. H. Ingram of Auckland, Managing Director of New Zealand Steel, Mr T. C. Larkin of Wellington, former New Zealand Ambassador to Japan, Mr James Maddren of Christchurch, Managing Director of Maddren Brothers and past President of the New Zealand Manufacturers Association, Professor R. G. Mulgan of Dunedin, Associate Professor of Political Science in the University of Otago. In addition, the Japanese Ambassador in Wellington and the Secretary of Foreign Affairs will be ex-officio members of the Board.

Purposes

The Foundation has the general responsibility of deepening and strengthening New Zealand's ties with Japan. The essential purpose of the New Zealand/Japan Foundation is to make people in New Zealand and Japan more aware of each other's interests and concerns. It pays special regard to the importance of trade to the relationship but is governed by the principle that trade will

Professor B. R. Penfold (above) has been appointed as Head of the Department of Chemistry for a term of four years from 1 February 1981 in succession to Professor J. Vaughan.

prosper best when the whole relationship is growing—not merely in its economic content but in its political, social, cultural and personal dimensions as well. The Foundation is seeking, accordingly, to shape its activities within a broad perspective. It will work in close cooperation with established groups already involved in building closer relations with Japan. And, on its own account, it aims at supporting and initiating programmes that will open up new 'forms of contact, enquiry and understanding' between New Zealand and Japan.

Activities

The form and scope of the Foundation's activities can be expected to change from year to year. But, for the present, the following are among its lines of approach:

- * the collection and presentation of information on New Zealand dealings with Japan;
- * the stimulation of research;
- * the extension of people to people contacts;
- * help in improving the facilities and opportunities offering in New Zealand for

(continued on page three)

Council News

People

Mr W. T. Royal has been appointed to the University Council as a co-opted member under Section 6(2)(d) of the University of Canterbury Act 1961 for a term of office ending on 30 June 1983. Mr Royal was originally appointed to the Council by the Governor-General in 1974, and in 1977 he was co-opted by the Council for a term of three years.

Professor J. Soons has been appointed as Acting Head of the Department of Geography during the absence of Professor W. B. Johnston on study leave for 300 days from 1 December 1980.

Dr J. B. Hearnshaw (Physics) will undertake research in Stellar Spectroscopy at the Observatory of the University of Heidelberg for one year from 25 August 1981 to 24 August 1982.

Dr R. F. Stowell (English) and Professor B. Tharoud of Mesa College, Colorado will exchange positions during the first and second terms of 1981.

Dr J. Abrahamson (Chemical Engineering) has been awarded the 1980 Research Medal of the New Zealand Association of Scientists for his work on carbon platelets and the theory of dust particle collisions in turbulent flow. The presentation was made at the Association's annual general meeting in Wellington on 23 October.

Grants

The Vice-Chancellor reported at the last meeting of the University Council that the following research grants had been received:

From the D.S.I.R. a grant of \$18,760 to Dr D. W. Lewis (Geology) for paleoenvironmental analysis of the Amuri Limestone.

From the D.S.I.R. a grant of \$2,092 to Mr B. Wearing (History) for production of a history of the New Zealand Geological Survey.

From Messrs Austral Standard Cables Pty. Ltd. a grant of \$6,000 to Dr H. G. Daellenbach (Economics) for a project to introduce a scheduling system using mathematical programming techniques.

Changes To Scholarships And Prizes Regulations

As a result of changes in the Junior Scholarship regulations which forbid co-tenure of a Junior Scholarship with "a scholarship provided from University funds", the University Council has approved recommendations from the Professorial Board to change the conditions of some scholarships and to establish new awards.

Senior Scholarships

From this year, Senior Scholarships will be increased in value from \$200 to \$300 per award. It will also now be possible for Senior Scholarships to be awarded without emolument where the prospective scholar is precluded from holding the emolument by virtue of another award. This means that Junior Scholars and others with similar awards (e.g. Colombo Plan students) could be awarded a Scholarship without emolument. In this way the honour would be shown on the student's academic record even though the student derived no financial benefit from the award.

University Prizes

Also from this year, new awards to be known as University Prizes may be awarded. These awards will be made on the basis of excellence in past performance and are not tied to future emolument in the same way as Scholarships. The new Prizes, which will be awarded by the University Council on the recommendation of the Professorial Board, will have a value of \$100 each. They may be awarded in December to students who have completed within the preceding twelve months the academic requirements for the award of a Masters degree, an undergraduate honours degree or a diploma with honours. Up to twelve prizes may be awarded annually on academic merit on the recommendation of the Faculties, which may normally make limited numbers of applications. No student may receive more than one University Prize.

John Connal Scholarships

Under the current regulations for these Scholarships, two scholarships of \$50 each are awarded for excellence in any one of the subjects specified by the late John Connal (Latin, English, French, History and Mathematics).

As from this year, the value of the scholarships will be increased to \$100 each, and a third scholarship will be instituted for which students of Economics will be eligible to compete.

The resignation of Mr N. S. Roberts (Political Science) was received with regret by the University Council. Mr Roberts has been appointed Director of the Centre for Continuing Education at the Victoria University of Wellington.

Parking And Traffic Regulations

The current parking and traffic regulations, which have applied since 1 January 1976, have now been amended to provide for increases in fines for offenders.

As from 1 January 1981 the following fines will be payable:

1. For neglecting or refusing to provide information, or for providing false information, to a Traffic Controller: \$6.
2. For any other offence against the parking and traffic regulations: \$6 with a reduction to \$4 if paid within seven days of the offence.

Student Representation

The University Council has approved a recommendation from the Professorial Board that student representation on the Board be increased from three to seven members.

The student members will be the President and two Education Officers of the Students' Association, together with four other students nominated by the Executive Committee of the Association.

(continued from page one)

study and use of the Japanese language;

- * sponsorship of seminars enabling people from both countries to understand better the relationships between them and to propose improvements;
- * the provision of funds to enable important discussions about Japan to be published here;
- * various forms of support to the media to assist people in each country to be better informed about life in the other;
- * steps to make New Zealand better known in Japan;
- * liaison with groupings, in New Zealand and elsewhere, that are engaged in shaping closer relations with Japan.

Public Participation

There is no lack of things for the Foundation to do nor of ways in which to do them.

It is true that the initial budget of \$40,000 is not large and since the Foundation's proposals will often have a commercial or economic content, the Directors will be looking occasionally for financial contributions from business interests in New Zealand and perhaps Japan. The Directors recognise the need to deploy the Foundation's funds effectively but do not see this as the final test of its work. This will be rather in the ideas it generates and the enterprises it inspires and in its ability to give greater edge and weight to efforts here to understand Japan. The Board accordingly welcomes proposals relevant to its purposes from groups and individuals within New Zealand. Correspondence should be addressed to the Secretary of the Foundation, C/o Ministry of Foreign Affairs, Private Bag, Wellington."

Projects

The Board of Directors have already announced first grants to be made by the Foundation:

- * To pay the return airfare to a New Zealand journalist to spend six months in Japan as part of an exchange programme with the Asahi Newspaper Company Limited in Tokyo, the largest newspaper in Japan.
- * To maintain an exchange programme with Kyoto-Sangyo University in Kyoto, Japan, under which scholars from that University will spend an academic year in New Zealand.

Other Activities

The Board of Directors will be holding their next meeting on 18 November, and will be inviting representatives of kindred organisations to this meeting to discuss New Zealand's activities with Japan and to explore areas in which the Foundation might co-operate with these established organisations.

The final meeting of the Foundation for 1980 will be held on 11 December.

Farewell To Dr Ivan Snook

Canterbury University's loss would be Massey University's gain when Dr Snook leaves his Readership in Education at the end of the year, said Professor David Gunby, in farewelling Dr Ivan Snook at a function in the Staff Club recently. Dr Snook has been appointed to a Chair in Education at Massey University.

Professor Gunby referred to Dr Snook's scholarship and international reputation, and commented on the lustre he would bring to his appointment at Massey.

Dr Snook has lectured in the Department of Education for the last 12 years. Besides playing an active role in the development of courses, he has produced a number of significant publications on the philosophy of education, taking a special interest in moral theory and its use by practising teachers. He has also been Chairman of the Canterbury

Branch of the A.U.T., and was for several years a Lecturers' Representative on the University Council.

Dr Snook, 47, who is married with three children, will take up his new appointment next year.

Education: A Choice Of Futures

The fourth annual social policy symposium under the auspices of Otago University Extension will be held in Dunedin from 20 to 23 November 1980.

It could be said that there is something of a crisis in education. It is a crisis which is finding expression in three main areas;

1. The Economics and Administration of Education.
Expenditure cuts—are they necessary, do they heal? The new Education Amendment Act and its centralising tendencies?
2. The Ideology of Education.
What should be taught in a time of rapidly increasing unemployment: back to basics, social education for living? How should it be done: free schools, alternative schools, traditional schools?
3. The Politics of Education.
Free, secular and universal education in New Zealand available to all? Has education as we have had it managed to overcome social and class inequality? Who should control the system—teachers, parents or central government?

These are critical issues which are causing intense concern. In the Educational Development Conference a large number of New Zealanders took part in discussions on the education system, and the debate rages on. The changes to date, however, have been cosmetic at best.

This symposium is an invitation to come, discuss and decide the changes you want. All participants will be asked to become involved in the exercise of designing together their own ideal education system. The background and nature of the current system, a series of radically different views of what education is all about, the current system and its critics, will all be discussed in detail by some of the best speakers in New Zealand. A major part of the Conference will, however, be devoted to the participants. Everyone will be challenged to design a system that will embody what they think should be done.

Mr Pat Shannon, MA, who has organised this symposium, is lecturer in applied social studies, Otago University Extension.

Further particulars are obtainable from the Registry concourse. The closing date for applications is 7 November.

Education 'Creates Wealth'

Labour should go further than merely restoring the cuts in education imposed by the Conservative Government, the British Labour Party's spokesperson on education, Mr Kinnock, told the party's conference recently.

Mr Kinnock produced a \$3400 million list of priorities headed by the introduction of educational maintenance awards for 16- to 19-year-olds.

He warned education would have to jostle for position in a queue of demands on public money when Labour was next in office. "We must stop thinking of education just as a user of resources and start thinking of it as it properly should be, as the great creator of wealth in our society."

Holiday's Over

The Polish Government can expect a new round of confrontations when the country's universities end their summer holiday this week, according to sources in Warsaw.

Students and academics will be making a series of demands based on last month's concessions to striking workers. Among the demands will be a call to reinstate academics demoted because of political views, free and secret elections for university administrators and consultations with students about promotion of academics and choice of subject matter for lectures.

Nuclear Protests

The University of California has agreed to renew its controversial contracts to manage the U.S.'s two nuclear weapons laboratories at Los Alamos and Livermore for another five years despite an appeal by Governor Jerry Brown and demonstrations by anti-nuclear activists.

Students and staff have waged a 10-year campaign to cut the university's links with the nuclear laboratories, which they claim are not compatible with its mission of teaching and research. The university gets about \$3 million a year for managing the laboratories.

Iranians' Escort

The U.S. government is trying to deport nearly 10,000 Iranian students known to be in the country illegally.

A government spokesperson said 59,000 Iranian students had registered with the Immigration Service during the last six weeks of 1979 after an order by President Carter, leaving an estimated 10,000 who failed to register. So far 500 had been escorted from the country. Hearings against the others were proceeding.

Forged Forms

Police checking through the belongings of a 25-year-old Iranian student killed in a road accident in Little Rock, Arkansas, have found forged and blank academic record transcript forms and diplomas made out in his own name and those of other Iranian students.

Stamps for the official seals of six universities in the south-western states were also found.

University Takeover

Finland's last surviving independent university, Aabo Akademi, is to be taken over by the state next August, according to plans outlined in the Government's 1981 Budget.

The nationalisation of the academy, with 3861 undergraduates and 209 academic staff, will complete a seven-year transition to state control of all tertiary institutions.

\$222,000 Study

Britain's Department of Education and Science has surprised higher education policy researchers with the announcement of a \$222,000 study of higher education.

The announcement comes only a month before the expected funding recommendation by a select committee on higher education for a different study, one which is already going on under Professor Gareth Williams of Lancaster University. The Williams study, hailed as a "mini-Robbins" and using a \$170,000 Leverhulme Foundations grant, now seems unlikely to get additional DES funding.

University Blockaded

Bolivia's military government, which took control in July, has shut the universities and dismissed a number of academics in a crackdown that has brought strong protests from the U.S. Government.

Troops are reported to be barring the entrance to the campus of San Andres University in the capital, La Paz.

Bias Claims

Canadian officials are investigating charges that the University of British Columbia failed to follow the proper hiring procedures in selecting an American over two Canadians to fill a zoology department vacancy. Under Canadian law, universities are required to determine that no suitable Canadians are available before hiring foreign academics.

Technical Tenure: Program Or Perish

Stanford University has discovered that some professors of science and engineering are reluctant to get involved with microcomputers. Either they have never become proficient in the computers' use or have never bothered—and they can always rely on knowledgeable graduate students. However, Stanford is attempting to alleviate this problem.

The Stanford School of Engineering has established a program to teach professors how valuable computers can be. The school's dean is buying them microcomputers to keep and use. Says Dean William M. Kays, the hope is to "get them hooked." Evidence indicates Kays' plan is succeeding.

The computers are mostly off-the-shelf Radio Shack TRS-80s, which cost the school about \$700 apiece. Dean Kays has agreed to spend a similar amount for any other brand if the professors want something more advanced. Some have opted for Apples or PETS. The money comes from the School's general gift fund; Kays has given away or made payments for 40 computers.

"I had real suspicions that there are still a lot of staff in the school of engineering who know something about computers and computation and who teach graduate students who know a lot about computers and computation. These faculty members' contact with computers is really through their graduate students," says Kays.

"So, I hit upon the notion of buying microcomputers for interested members of the faculty, but I had to do it with some controls because there was no use just giving computers to them, having the computers sit in the corner of the office not being used. The deal I made for them was that they have to make applications for me, and tell me in this application what they are going to use it for—and in particular, how they might use it in connection with some classes. The emphasis is on teaching here, although I don't preclude research."

"Two months after they get the computer they have to take a test from me. I personally give this test. They must write a 25-line program; it has to have some interactive features, and has to have string variables. Otherwise, it can be written in BASIC or FORTRAN or whatever they want." Kays says it is nearly impossible to flunk the test, and so far no one has. Should anyone fail, the computer has to be returned.

Kays says he is satisfied with the results and has ordered more computers. "This is cheap and effective education."

Vacancy: Technician

Applications are invited for the position of Photographic Technician in the Department of Botany.

The appointee's main duties will involve darkroom work such as developing and printing monochrome film, and the preparation and copying of slides. Previous experience in macro, colour and photomicrography would be an advantage. The appointee will have responsibility for the day-to-day running of the Department's photographic suite and will be expected to undertake duties in other areas of the Department's activities. An interest in, or willingness to develop, other skills, e.g. electronics, could be an advantage.

The salary scale for Technician Grade I is \$8,547 to \$10,958 per annum. Commencing salary according to qualifications and experience.

Further particulars and Conditions of Appointment may be obtained from the Registrar with whom applications close on 14 November 1980.

Twenty Years On

Several years ago the New Zealand Council for Educational Research initiated a follow-up study of about 1800 students who first enrolled at a New Zealand university in 1955. After an extensive search the Council traced about three-quarters of this large sample, and eventually obtained completed questionnaires from 1192 of them. This response rate was considered to be very good indeed after such a lapse of time, and although the task has been a lengthy and complex one, the Council's Chief Research Officer says that they have been very encouraged by the warm and generous response to their requests from so many people, former students and their parents, university authorities and many others.

The fruits of these labours have now been published in a booklet *Twenty Years On* which reviews the highlights of the information analysed thus far. A copy of the booklet is available for inspection in the Information Office: copies may be ordered from the Council, P.O. Box 3237, Wellington, at a cost of \$2.50.

Letter To The Editor

"EEL EST MORT"

It is with regret that I report the death of the 3½ ft. finned eel that has been a long time resident of the branch of the Ilam stream adjacent to the Civil Engineering Laboratory wing. This noble creature is thought to have succumbed to the fork of one of the ground staff during weed clearing operations.

No flowers—donations to Greenpeace.
R. M. Hodgson
(Electrical Engineering)

Inter-Departmental Fun Run

What has now become an annual event—the Inter-Departmental Fun Run—will be held this year at 12.30 p.m. on Monday, 1 December.

Teams consisting of 5 people each will compete, not in finding the fastest runners, but in predicting accurately the combined times of the runners for the course. The course for this year has been lengthened, but it is estimated that it could be walked easily in about 35 minutes. There is a maximum time allowed of three hours.

Further particulars and application forms may be obtained from the Recreation Centre. Entries close on Monday 24 November.

See you there!

Obituary

Old-age laboratory mice worth \$75,000 taking part in longevity experiments died when a University of Southern California air-conditioning unit broke down.

The 1500 mice had lived the equivalent of 80 human years. University officials said they were uncertain where they would get money to replace the dead mice.

Faulty Review

A review panel at the National Institute of Education has concluded that the findings of a recent study on vocational education by the University of California are not supported by the evidence. The three-year study, conducted by Wellford Wilms under a \$171,000 NIE grant, concluded that vocational education did not provide equal opportunity in the job market for economically disadvantaged students, and that proprietary schools provided vocational education more efficiently than community colleges.

Staff Wives' Club

Sunday, 2 November

Godley Head Walk, Family Outing

Meet at Taylor's Mistake at approx. 2 p.m. The walk is 6 km long and takes about 2 hours. Please wear sensible shoes, and bring something to eat and drink on the track. As the track follows cliffs for part of the way, children must be kept under close supervision. If weather is doubtful, a cancellation notice will be broadcast on 3ZB at approx. 7.30 a.m.

Wednesday, 5 November

Azalea Morning

10 a.m.-noon, Ilam Homestead

The azaleas should be at their best, so you are invited to come and have morning tea in the Homestead, and then walk around the gardens. Children are welcome.

Saturday, 13 December
Children's Christmas Party
Ilam Homestead

If you would like more details, please phone Joan Earl, 588-593.

A.C.N.G.T.

The first report of the Advisory Committee on Novel Genetic Techniques for the year ended 31 March 1980, which outlines the main activities of the committee to date, has been received and is available for inspection in the Registry concourse.

Attached to the report are the *Revised New Zealand Guidelines* for investigators undertaking research in novel genetic techniques, and the D.S.I.R. has requested that members of the academic staff be reminded of their obligations to meet the requirements of these deadlines.

Higher Standards

The Israelis have increased their authority over four Arab universities on the occupied west bank of the Jordan River. In a series of amendments to a 1964 Jordanian law governing higher education in the area, the Government has established minimum standards for the institutions and required them to make annual reports of their educational activities—moves which would give the Government control over academic appointments, according to spokespersons at the universities.

Notices

Overseas Research Students

The Fees Support Scheme for Overseas Research Students was set up by the Secretary of State for Education and Science in 1979 to provide Awards for partial remission of tuition fees to overseas postgraduate students of outstanding merit and research potential.

Some 500 new Awards will be offered on a competitive basis in 1981. Each Award will cover the difference between the tuition fee for a home postgraduate student and that chargeable to an overseas student.

Award holders will be overseas graduate students who will, in Session 1981-82, be commencing or already undertaking full-time study for a higher degree by research at an approved Academic Institution in Britain.

The Awards are made to individuals and not to Academic Institutions. They may be held in any field of study. Subject to the satisfactory progress of the Award holder, they will be renewed for a second and third year, according to the normal length of the research course being undertaken.

The only criteria for the Awards are outstanding merit and research potential; other factors, such as means, nationality, proposed field and institution of study, will not be taken into account.

The Scheme is administered by the Committee of Vice-Chancellors and Principals of the Universities of the United Kingdom. The CVCP has appointed a special Committee, composed of representative senior members of academic staffs of the Academic Institutions, to be responsible for the selection of Award holders and for the detailed management of the Scheme.

Further details will be available by 15 December 1980 and may be obtained from the Registrar or Secretary of any of the Academic Institutions in Britain.

Security Patrol Telephone Numbers

As from midnight Friday 10 October 1980 the Campus Security Patrol may be contacted on these numbers:

Extension 463	(No Change)
489-024	(No Change)
495-649	(New Number)

Ask for "Security" and make it quite clear you wish to get a message to the *University Security Patrol*. This number belongs to Crown Crystal and replaces 497-089. It does not appear under our entry in the new Christchurch Directory.

Accommodation

For Sale

Balgay Street—six minutes walk from the University. Three bedroom weatherboard house, including sunroom, lounge, kitchen-dinette (with wetback), single garage (with power). Large section (42 perches) in immaculate condition. Price \$28,500. Ring ext. 8845; or 43-508 (home).

Section For Sale

Drive-on formed access to magnificent 796 sq.m. fully serviced building site. Situated at the end of road in Selleck Street, Highland Heights and commanding an uninterrupted view of Pegasus Bay and Alps. This section cannot be built out. Plans available for inspection. Government Valuation \$14,000. Telephone owners: 487-565.

To Let

Visiting Wellington this summer? House- and cat-sitter wanted from 19 December to 3 February. Furnished home in a quiet suburb (Karori), close to transport. Suitable for couple or single person. Telephone Wellington 764-657 (evenings).

For Sale

Spinning wheel, upright Ashford, hardly used. \$65 o.n.o.

Kitset bookshelves and accessories, complete. Assorted lengths (37"-73") and two widths (7½" and 11½"). Excellent condition, receipts available. Will sell all or part. Bargain price.

Bicycle, gent's, 3-speed, dynamo lighting, carrier. Excellent running order. Available late November by previous arrangement. \$125 o.n.o.

Typewriter, portable, \$40 o.n.o. Portable radio/tape recorder, \$30 o.n.o. Television, \$25 o.n.o. All available late November by previous arrangement.

Electric bar heaters, assorted sizes.

Enquiries to ext. 613 (day) or 486-893 (evening).

Gardening, lawns, and odd jobs done during weekend by honest, reliable worker. Anything considered. Telephone 238-635 after 5 p.m.

A.U.N.A.S. Christchurch Hams And Poultry

The prices of hams and poultry have been set as follows:—

HAMS

Whole, on the bone	\$5.25 per lb
Half, on the bone	\$5.45 per lb
Whole, pressed	\$6.35 per lb
Half, pressed	\$6.55 per lb

CHICKENS

No. 5	\$2.61 per kg
No. 7	\$3.06 per kg
No. 11	\$3.96 per kg

TURKEYS

\$2.93 per kg. Weight range: No. 1, 2 kg-2.875 kg; No. 4, 4 kg-4.875 kg; No. 5, 5 kg-5.875 kg.

DUCKLINGS

No. 9	1.625 kg.
No. 10	1.75 kg.
No. 11	1.85 kg.

(These are subject to confirmation.)

Extra order forms are available from the A.U.N.A.S. committee members, or from the *Chronicle* (17 October issue).

Enquiries should be directed to: Brown, Chem. Eng. (ext. 750); Ronwick, Elect. Eng. (ext. 389); Nigel Lain, Flats (43-441); David Macaree, Maintenance (ext. 268).

Please remit money as per the form, not as per the above prices. David Macaree, Maintenance.

The closing date for all orders is Wednesday 19 November.

Squash Tournament Results

The winners of the recent Staff/Ph.D. Student Squash Tournament were:

Division A
Winner: P. Carpenter (Physical Education)
Runner-up: G. Cordery (English)

Division B
Winner: R. Haase (Physics)
Runner-up: M. McLennan (F.R.I.)

Division C
Winner: H. Bechapunya (Chem. Engineering)
Runner-up: D. Johnson (Geography)

Division D
Winner: E. Ritchie (Psychology)
Runner-up: F. Smith (Psychology)
